Prepared by the Trade Analysis Branch, Commercial Agriculture Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Joel L. Greene and Lilia E. George. Mrs. George also provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Publications Services Branch, Information Services Division, Economic Research Service. Data processing support is provided by Kenneth King, Information Technology Services, Information Services Division.

Digest

U.S. Agricultural Exports Reach Record \$45.7 Billion (see p. 2)--U.S. agricultural exports in the last quarter (October-December) of 1994 were a record \$14.1 billion, a surge that pushed exports to a record \$45.7 billion. Bulk exports gained 2 percent to \$18.6 billion, and high-value products (HVP) rose 11 percent to \$27.2 billion. There were strong gains in cotton, red meat, poultry meat, and horticultural products.

U.S. Agricultural Imports Reached New High in 1994 (see p. 5)--Calendar year 1994 agricultural import value gained for the third consecutive year, rising \$1.8 billion to a record \$26.8 billion. Both competitive and noncompetitive import value rose. Coffee was the single greatest contributor, surging almost \$1 billion, with every other major category, except meat and leaf tobacco, increasing. Economic growth in the United States and demand for bulk commodities after low production in 1993 helped boost agricultural imports in 1994.

Notice

FATUS tables A-2 and B-3 are now available over the CALL-ERS/NASS electronic bulletin board. Set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229 or 1-202-219-0377 to access the bulletin board. Log on as a new user and follow the instructions. The tables are self extracting archives which are decompressed by typing the file name at the command prompt.

U.S. Agricultural Exports Reach Record \$45.7 Billion

U.S. agricultural exports in the last quarter (October-December) of 1994 were a record \$14.1 billion, a surge that pushed exports to a record \$45.7 billion. Bulk exports gained 2 percent to \$18.6 billion, and high-value products (HVP) rose 11 percent to \$27.2 billion. There were strong gains in cotton, red meat, poultry meat, and horticultural products.

Bulk Export Volume Declines

Total bulk export volume fell 9 percent to 97 million tons in 1994 because of lower wheat, coarse grain, and oilseed shipments. However, export value gained 2 percent to \$18.6 billion with higher commodity prices offsetting the decline in volume.

Rice and cotton were the only bulk commodities that increased in 1994. The value of rice exports exceeded \$1 billion, the highest since 1981. Volume totaled nearly 3 million tons, the highest since 1989. Japan was the leading market for rice exports, with purchases of nearly 500,000 tons, followed by the European Union (EU) with over 350,000 tons, and Brazil with over 340,000 tons of mostly rough rice. U.S. exports of rice to Brazil expanded in 1994 because Vietnam, Brazil's usual supplier of rice, exported most of its rice to China.

U.S. cotton exports increased 53 percent to 1.7 million tons because of declining supplies in Pakistan and India, and strong demand in China. China was the largest market with imports of 400,000 tons from the United States, compared with only 179 tons in 1993. The export price for U.S. cotton topped \$1,500 per ton, 13 percent higher than in 1993, leading to a 73-percent increase in value to \$2.7 billion.

The export volume of wheat, coarse grains, and oilseeds were down 11 percent, but higher prices in 1994, compared with 1993, limited the value decline to 7 percent. Egypt was the leading market for wheat in 1994 (5.2 million tons), followed by Japan (3.3 million tons), and the Philippines (2 million tons). Japan was the leading market for coarse grains at 14 million tons, Mexico was next with 6.5 million and then Taiwan with about 5 million. The EU imported 7.1 million tons of soybeans, followed by Japan with 3.3 million and Mexico with 2.1 million.

HVP Exports at Record Level

HVP exports increased 12 percent to \$27.2 billion in 1994. Exports gained in almost every commodity category. Intermediate HVP products rose because exports of hides and skins reached \$1.5 billion and vegetable oil rose to a record of nearly \$1.4 billion. But much of the gain in HVP exports was in consumer food items, primarily fruits, nuts, vegetables, red meat, and poultry meat.

U.S. exports of fruits, nuts, and vegetables increased 14 percent to \$8.4 billion in 1994. Canada was the major destination for U.S. exports at \$2.3 billion. Strong fruit and vegetable sales to Japan of nearly \$1.5 billion pushed U.S. exports to Japan above exports to the EU for the first time since 1989. Fruit exports to Canada decreased 6 percent to \$686 million, while strong exports to Japan boosted its total to \$623 million. Fruit exports to Taiwan jumped 45 percent to \$201 million, and sales to Mexico jumped 67 percent to \$185 million. Nut exports rose to \$1.3 billion on increased almond sales to the EU.

Total vegetable exports to Canada increased 10 percent to \$1.3 billion, but the fresh vegetable component declined 7 percent to \$659 million. Shipments to Japan rose 43 percent to a record \$672 million, and exports to Mexico rose 42 percent to a record \$263 million.

U.S. red meat exports rose 11 percent to a record \$3.7 billion. Beef exports rose 16 percent to \$2.3 billion, pork gained 13 percent to nearly \$550,000, but variety meat exports were unchanged at \$560,000. Red meat exports to Japan increased 4 percent to \$2 billion, exports to Mexico topped \$500,000, surpassing Canada's imports of \$464,000.

Poultry meat exports jumped 43 percent to \$1.6 billion on strong demand in the former Soviet Union (FSU), Hong Kong, Mexico, and Japan. Exports to the FSU totaled \$330 million compared with \$89 million in 1993, making it the leading market for U.S. poultry meat. Exports to Hong Kong rose 62 percent to \$274 million. Shipments to Mexico increased 12 percent to \$228 million, and exports to Japan rose 22 percent to \$174 million. *(Joel Greene, Trade Analysis Branch 202-219-0816)*

U.S. Agricultural Imports Reached New High in 1994

Calendar year 1994 agricultural import value gained for the third consecutive year, rising \$1.8 billion to a record \$26.8 billion. Both competitive and noncompetitive import value rose. Coffee was the single greatest contributor, surging almost \$1 billion, with every other major category, except meat and leaf tobacco, increasing. Economic growth in the United States and demand for bulk commodities after low production in 1993 helped boost agricultural imports in 1994.

Broad Gains in Competitive Imports

Imports of competitive products advanced just over \$700 million to \$20.1 billion, with gains in most commodities, except for tobacco. Tobacco import value plummeted 55 percent to \$613 million, and volume fell 47 percent to 243,000 tons, reflecting the effect of the first full year of restrictions on foreign leaf use in U.S. cigarettes. Grain and feed imports rose over 29 percent to \$2.3 billion after low U.S. corn production in 1993. Canadian barley shipments increased by \$130 million to \$180 million with volume up 1.4 million tons to nearly 2 million tons. Oilseed and products gained 31 percent to \$1.6 billion, and volume rose 700,000 tons to 3.3 million in 1994, largely due to imports of Canadian rapeseed and soybeans.

Horticultural imports advanced 9 percent to \$6.9 billion. Fruit imports rose 8 percent to \$1.5 billion, with mangos and melons from Mexico, and grapes from Chile, leading. Vegetable import value was up 11 percent to \$2.7 billion with prepared vegetables (pickles, canned mushrooms, artichokes, and prepared tomatoes) accounting for the largest part of the gain. Wine and beer imports gained 6 percent in value, reaching \$2.1 billion.

Wine import value from Italy and beer volume from the Netherlands were the major factors.

Meat imports fell 5 percent to \$2.7 billion. Beef value fell slightly to \$1.8 billion and pork was unchanged. U.S. beef production remained high, lowering prices and making the U.S. market less attractive for other producers. Meat prices were held down by abundant supplies of pork and poultry. Volume of both fresh and frozen pork, and prepared pork from Denmark were up slightly, offsetting declines from other sources.

Coffee Boosts Noncompetitive Imports

Noncompetitive imports gained \$1.1 billion to \$6.7 billion. High coffee import unit values were the single greatest factor in the sharp rise in overall value. Poor weather in major coffee growing regions, primarily Brazil, and reduced production elsewhere, pushed coffee import unit values from \$1,361 per ton in 1993 to \$2,660 per ton in 1994. This caused total coffee import value to jump from \$1.5 billion to \$2.5 billion, even though volume declined from 1.1 million to 900,000 tons. U.S. coffee processors imported coffee at high prices to replenish low bean stocks. Coffee accounts for over half of the increase in total import value.

Banana imports were steady as lower imports from Mexico were offset by shipments from Central America. Cocoa import volume fell 16 percent to 671,000 tons due to lower exportable supplies in Brazil, Malaysia, and Sub-Saharan Africa. Value edged downward to \$1 billion. Rubber import volume fell, but higher unit values pushed value up slightly to nearly \$1 billion. Import volume from Malaysia and Indonesia declined due to low production, but higher prices raised import values. *(Tom Capehart, Trade Analysis Branch 202-219-1262)*
